

smartglass

Microsoft®

Lisbon, Portugal

Completed: 2012

SmartGlass Volume: 750m²

Design by 3G-Office

SmartGlass allows for easy and instant alterations of space, delivering privacy to carry out important meetings and presentations without distractions from onlookers and co-workers.

SmartGlass provides simple and reversible states of transparency with no alteration in light level making it an ideal solution for office interiors where ample lighting is fundamental.

For phase I, the contractor had chosen a competitor's privacy glass which was rejected by Microsoft on site. SmartGlass International produced and delivered approximately 400m² of SmartGlass in 2 ½ weeks, with no rejections on site.

For phase II, the privacy glass (350m²) went to tender with Microsoft insisting on a 2 week lead time. SmartGlass International was the only company to accept and deliver on this tender, with other companies insisting the lead time was impossible.
